

Richard Duffee for Congress CT 4th District

We're trained to believe that our interests are opposed to the rest of the world. But ***what's best for the world is best for us.***

The news media overwhelm us with stories of terrorism and Iraq. But Nuclear Winter from accidental war and Global Warming from CO₂ emissions are far greater threats to our security.

Richard Duffee proposes:

To safeguard our physical security

- 1) Make Nuclear Winter impossible. All states with nuclear weapons should disarm proportionately until all nukes are destroyed.
- 2) Stop Global Warming. Devote all military research monies to renewable energy and improving energy efficiency.

To enhance international stability

- 1) Reform international economic organizations to lift out of absolute poverty the 1.2 billion people who are now malnourished.
- 2) Earn the world's trust by closing Guantanamo and strictly observing international law. We should ban all covert operations intended to prop up tyrannies and overthrow democratically elected governments. We should join the International Criminal Court and prosecute international criminals.

To improve our quality of life

- 1) Disparities of wealth lead to increased crime and disease. Create a fairer society by restoring taxes on millionaires and corporations to levels of the 1940s.
- 2) We have the most wasteful medical system on earth. Single-payer universal health coverage will eliminate nearly all administrative overhead.
- 3) End race and class injustice of the phony "War on Drugs." Reduce our bloated prison population (at 0.7%, highest in the world).

What must we do first?

- 1) We need massive reform of election law, including a tamper-proof voting system, public funding of all campaigns, instant runoff or range voting, and proportional representation.
- 2) **Impeach Bush and Cheney,** domestic enemies of the Constitution

Now we have imperial government of the rich, by the rich, for the rich. Let's get our republic back!

Richard Duffee, a Stamford resident, is a writer, teacher, and retired lawyer who lived in South Asia for nine years and taught law there.
